DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31, drawn to method of operating an image sensor, classified in class 250, subclass 208.1.
 - II. Claims 32-58, drawn to image sensor apparatus, classified in class 250, subclass 214R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions the method of operating an image sensor and image sensor apparatus are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, from the claim structure, it clear shows that the same method can operate different apparatuses and the apparatus can be operated by different methods.
